

APodC Policy on:

Fees

The Council supports the concept of podiatry fees, without medical referral, being tax deductible.

Council supports removal of the requirement, for tax deductible purposes, that a medical referral is required for podiatry treatment.

Due to differences in costs of running a private practice in different states, the Council will, as a result of a practice cost survey, develop a formula which will provide a basis for a recommended fee schedule.

Council recommends that the item numbers and description of podiatry services listed in the Australian Podiatry Manual be adopted by all states.
